David R. Yuill-Kirkwood

Profile

I have an excellent working knowledge of Cisco network infrastructure and security, and many industry leading software applications. I work to the highest standards have an eye for detail, design and organisation, highly developed skills in problem identification and an analytical/logical approach to the implementation of effective solutions. I am comfortable with analysing and understanding data, working under time pressure, and presenting myself in a professional manner and working both in a team and with the public.

Interests

I keep a small flock of Chickens. I am passionate about movies and photography, working with Adobe Lightroom CC, Photoshop CC and Premiere Pro CC to create my content. My work can be found on my website and blog with videos I create and share on YouTube. Additionally, I enjoy streaming, travelling, gaming, and reading.
