Professional Product Photography

Presenting your products in the best light is good for business and professional product photography is a necessary investment for achieving this.

As a professional photographer, I will consistently and efficiently deliver high quality eye-catching photographic images which represent the attributes, features and details of your product to give customers all the information they need to make an informed and confident purchase, this is particularly important for online eCommerce.

Businesses who invest in professional product photography will benefit directly from improved brand identity, customer confidence, sales and even a reduction in rates of returns. Consumers today are surrounded by commercial photographic imagery and it should come as no surprise that studies have shown that the majority of consumers can easily tell the difference between a good product image and a bad one. In addition, the majority of consumers will not purchase a product online if the imagery representing it is not good enough.

These are some of the reasons why it is fundamental for businesses, both small and large, particularly online, to invest in a suitable product photographer with the skills and experience to consistently deliver professional quality imagery.

CREATIVE PRODUCT PHOTOGRAPHY:

With creative product photography, we can alter many of the standard elements which affect the look of an image, such as the addition of distinctive backgrounds, surfaces, props and styling. This generally concerns items for specific advertising purposes such as in product packaging where a high-end finish is required as well as for print advertising.

PACKSHOT PRODUCT PHOTOGRAPHY:

A Packshot is most easily defined as a simple photograph of a product on a white or plain background and is frequently used in catalogues and e-commerce sites. This simple, clean and consistent image production allows for a professional eCommerce product layout.

Features of Packshot Product Photography at a glance simple "product on white" photography, shadow/reflection/clipping path options available.

Event Photography

Are you are looking for a professional photographer for your event. Whether it is a business, or private event, Sporting or Photo Op or Convention.

Capture the moment in 360° Photography. We offer high-quality event photography for all sizes of events.

Why not enjoy some post-production fun shooting your guests against our green screen backdrop, replacing the background with one of your choosing?

Event Photography Pricing

Aerial Photography

Video for Advertising

Aerial photographs and video added to your promotional video or website is an important element to your brand awareness. A short Aerial Video or Aerial Photographs could help give a potential client or customer a greater view of your business.

Special Event

Capture those impossible to get shots from giving you those extra special moments from your wedding day, sporting or music event from a new perspective.

Commercial Use

Drones are capable of viewing difficult to reach locations that can be considered expensive, dangerous, or even impossible to approach by manned inspection teams.

Aerial Photography Pricing

Prices start at **£75**

**Mileage and insurance fees may apply*

Photo Editing, Restoration, & Video Editing

Damaged, torn, or faded? We can digitally repair and restore your photos, restoring your beloved memories.

Have you taken Portraits, landscapes, artistic shots and feel that you want more from your image? With the use of Adobe Lightroom and Photoshop, we can dramatically enhance your images.

Along with still photography, we also offer video production services from restoring an old shaky handycam wedding video to cutting together an advert or fun entertainment production.

Pricing

Photo Editing & Restoration

Per Approved Processed Photo Pricing

£15 1 to 4 photos

£10 5+ photos

£15 3D Facebook Photos Conversion

Photo mounting service start at **£15**

Video editing from **£35** per hour

Collaborations

If you have a new or creative or really fun concept that you would like to try out or would like to help me practice or try some new and want to collaborate with me on a photo shoot, video, 360 or drone shoot, send me a message. If your idea sounds fun to me, we can work out a photoshoot.

I offer collaborations, or trade shoots for everything from artistic and cosplay. In these photoshoots, everyone works for free, and everyone receives the photos to use in their portfolios.

These shoots are creative collaborations between you and I, both of us must agree on the look and feel of the shoot.

These shoots normally take between 1 to 2 hour or could run all day or night depending on the nature of the shoot we have agreed to collaborate on.

You will receive a minimum of 10 edited photos from the shoot in addition to all unedited photo (except for a corner watermark) taken during the shoot. All photos provided may be used however you choose without restriction. Additional edited photos can be purchased for discounted £5 each.

I do have some guidelines on these shoots, and I ask every model to sign a release.

Guidelines

All models must have a signed Model Release on file with me. If you have not provided a signed release, please download the document from our website or our brochure, sign it, and return it to me no later than the start of our scheduled photo session.

You are welcome for your comfort to bring a friend/escort with you to the shoot. In fact, I encourage it! Your escort cannot be disruptive to the shoot and your escort might be asked to assist with simple tasks.

Although everyone works for free in these shoots, if a location has been chosen that requires us to travel, we would split the fuel costs and costs of any shared snacks and refreshments we purchase during the shoot.

For further details and guidelines please visit our website.

Website Design

Your website is at the core of your online presence, it threads out to all other aspects of your online world. As more and more business is conducted online the modern customer and consumer, when they are looking for a Product or Service the first thing they do is pull out their phone or launch their browser and *Google It*. Your business may even be local to them but if you are not on the map or have no online presence you are going to lose potential customs.

Transparent-Aluminium.net we offer both Businesses, Individuals, and Organisations the opportunity to expand their customer base, making the critical move to the online marketplace, showing the world what you have to offer.

Not only can we create a website for you, but we will also open the doors to a new line of customers with eCommerce. Integrating an online store to your website allowing you to reach new customers and allowing them to safely and securely pay online with services like PayPal, or even in Cash or Cheque if your Business prefers.

What we can offer you:

- Website Creation
- Online Store Creation
- Product Photography
- Business Photography
- Social Media Setup & integration into your website
- Search Engine Optimisation
- Google/Apple/Bing/ Maps setup
- Web Mastering Tools setup
- Domain and Hosting Support*

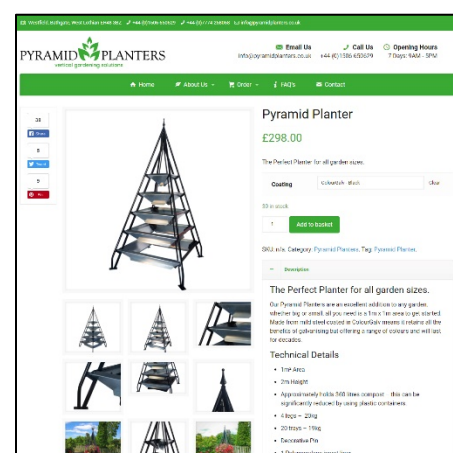

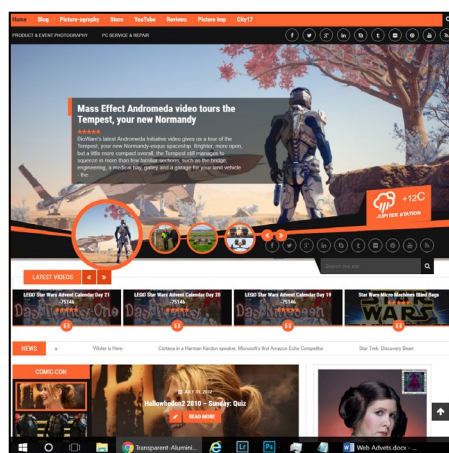

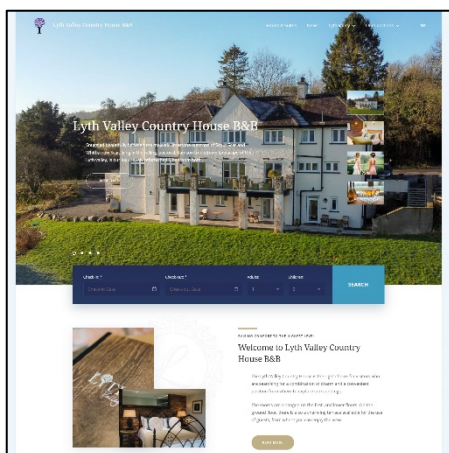

*We don't provide hosting or domain names but will work with you to purchase it and set it up for you.

There are services out there that allow you to build a website on your own, but these still require a steep learning curve, and that is time and resources that a small business owner cannot afford. We will handle all the complicated and technical aspects of giving you your online presence and offer complete training to help you manage and understand your website and social media, as well as continued support, in Person, on the Phone, or by Remote.

Website Design

Take a look at some of the websites and online stores we have already created.
